Answer to assignment 1b

The position on hospet.online for the keyword “hospet” on desktop version is

Your answer

2nd

The position on hospet.online for the keyword “hospet” on mobile version is

Your answer

2

Browse through all the pages of hospet.online and tell us what do you think. What did you like the most about the website? Is there something that you didn't like? How can you help hospet.online?

Check all pages for any UI improvements and take notes along with the page URL.

Inspect for minor and major flaws and take notes along with the page URL.

Your answer

600 words minimum

The website was pretty nice. What I liked most was that it was easy to use and

Loaded fast. It also formatted well on the mobile version.

All the URLs were working fine.

What I did not like was that many links led to ads all the time so the experience was annoying at times.

Also at the bottom of page it shows “Instagram has returned invalid data” so that needs to be fixed.

In the mobile version there is a lot of scrolling which is not a very good user experience in my opinion. Cards can be used to solve this problem.
